Nativity School

Orchard Park, NY

As classrooms across the nation continue to tap into the power and resources offered by instructional technology it is important for educational institutions to be able to meet these challenges head-on.

Nativity of Our Lord elementary school (preK-8) engaged Escapewire Solutions for a Managed Services agreement to encompass all aspects of their IT operations and support. Additionally, Escapewire was tasked with projects that allow school to stay ahead of current technology such as student iPad deployments while at the same time securing information systems and sensitive data.

As a result, the school has able to more efficiently manage their IT investments as well as increase the quality their instructional technology. As important is securing of faculty, student and staff data with the capability to recover mission critical data in the event of a disaster by backing up locally and to a secure offsite data-center.

Technology integration is critical and complex for any educational institution. EscapeWire has been our partner, advisor and support as we faced the challenge of improving the digital infrastructure and quality of instructional technology on our campus. EscapeWire continues to provide top notch technical support and well as network and data security.
